# Mobile App KMG-Lite

For many users, documentation of results is an important part of force measurements with the KMG-Lite. The mobile app simplifies the storage of your measurement data and transfer of the report to your client.

Your Smartphone or tablet connects wirelessly to the KMG-Lite\* and forwards the measured values directly to the app. In combination with the order information, a standard-compliant protocol is created, which can be sent immediately as a PDF file by e-mail. With activated location detection, the report contains the location data as a map or as a QR code. The app is available as a free download via App Store or Google Play.

\* Required Bluetooth module optionally available

- Simple, uniform and standard-compliant documentation of measured values
- Immediate creation and transfer of the report as a PDF file
- Usable offline - convenient storage of measurements for later mailing
- Location can be integrated into the report as a map or QR code
- Free download from the App Store and Google Play

Further information on force measurement:  
[www.kmg-lite.com](http://www.kmg-lite.com)

## Easy to use:

1. Download and open app

2. Switch on device and establish connection

3. Enter company data + logo

4. Start and save measurements

5. Enter order data and send report
